

Reliability, safety and ease:  
a better outcome.

Hill-Rom®

Enhancing outcomes for patients and their caregivers.®

## THE HILL-ROM DIFFERENCE

At Hill-Rom, we bring a rare combination of strengths to everything we do. Our stretchers are a great example of what makes us unique.

### *Portfolio*

As the industry leader in hospital beds, we've applied innovative technology to a variety of settings across the healthcare spectrum. Our stretchers begin with the reliable engineering you expect from Hill-Rom, but they are configured to meet each care area's unique needs. They have all the features you need, and none you don't.

### *Connectivity*

We believe in connecting people, process, and product in everything we do. With this in mind, we've designed our stretchers from a holistic perspective, ensuring that they work seamlessly with other Hill-Rom® safe patient handling products like lifts and stretcher boards.

### *Outcomes*

Hill-Rom is dedicated to helping customers achieve a better outcome, and stretchers are no exception. Whether it's requiring less deployment force or making patient ingress and egress easier, our stretchers are always built with a positive clinical result in mind.

#### A UNIQUE APPROACH

Stretchers can be the unsung heroes of the healthcare environment. They take a beating in the toughest conditions, but still do their job reliably and without fail. Without seeking the spotlight, stretchers play a pivotal role in helping you deliver the best patient care.

At Hill-Rom, we believe in the importance of stretchers. But we see reliability as only part of the equation—making a difference in caregiver safety and ease is just as critical. So we've designed our family of stretchers to meet unique caregiver needs across a

variety of settings, from procedural and transport to OB/GYN and surgical. The result—a safe, easy stretcher experience—is a better outcome for everyone. With stretchers from Hill-Rom, you'll see the results. But you'll feel the difference.

## THE INDUSTRY'S MOST EXTENSIVE STRETCHER PORTFOLIO

Whatever your clinical need, we have a stretcher to meet it—and help you achieve a better outcome in the process.

*Procedural Stretcher with  
IntelliDrive® Powered Transport*

**4-SIDED BRAKE AND STEER**  
**OPTIONAL ON ALL STRETCHERS**  
**STANDARD ON**  
**INTELLIDRIVE® SYSTEM**

## **FEEL THE DIFFERENCE IN:**

### **CAPACITY**

Hill-Rom is the only hospital stretcher company to offer a 700-pound weight capacity for all of its stretchers. This versatility makes Hill-Rom's stretchers perfect emergency stretchers, able to handle almost any circumstance.

### **STABILITY**

An industry first, our Auto Contour™ Feature allows automatic rising of the knee section as the fowler is raised. This helps minimize patients slipping down the mattress and minimizes patient repositioning.

### **SAFETY**

Our BackSaver Fowler® Feature uses the patient's own weight to help you raise and lower the head section of the stretcher easily and comfortably.

### **EASE**

Thanks to foot pedal deployment on our powered stretcher, it's never been easier to get moving.

### **CONTROL**

A convenient hand brake helps you negotiate ramps and corners without using your body weight, resulting in safe and easy stops.

### **CONVENIENCE**

Another industry first, our Integrated IV Stand Transport Device helps promote proper ergonomics when using the stretcher with an IV stand and emergency room equipment.

### **SERVICE**

Our hospital stretcher service warranty is backed by staffed service centers located throughout the country.

### **ACCURACY**

Our highly accurate built-in scale displays both pounds and kilograms simultaneously, eliminating the need to toggle between the two.

**700 POUNDS**  
**THE INDUSTRY-LEADING CAPACITY**  
**OF ALL HILL-ROM® STRETCHERS**

## THE DIFFERENCE IS IN THE DETAILS

Every stretcher in our portfolio contains special features to ensure a better outcome whenever possible.
